EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

On page 4, line 9, "8" has been changed to -9—to correct an obvious typing error.

2. The following is an examiner's statement of reasons for allowance: Among other things JP200270903 fails to teach or show a footwear liner put in a footwear, a liner body being detachably inserted and an receiving part formed of elastic material for detachably receiving the insert member to absorb impact applied to the insert member to give smooth feeling to the foot of the user. Among other things KR2002-0057917 fails to show a receiving part formed of elastic material for detachably receiving a heavy weight material which is installed on a rear portion of a liner body detachably inserted into the footwear. KR'917 perhaps shows a removable liner body and heavy weight material but there is no additional receiving part installed in the liner body and let alone one that is elastic. Among other things KR 20-0285242 fails to teach or show a footwear liner put in a footwear, a liner body being detachably inserted and an receiving part formed of elastic material for detachably receiving the insert member to absorb impact applied to the insert member to give smooth feeling to the foot of the user. The

elastic members 12,14 are placed above the weights and don't not receive the insert members (weights).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
